

Hedges & Edges Survey Project

As part of our Hedges & Edges project we have decided to start surveying hedgerows in our target areas (Upper Lune, Greta & Rawthey, Eamont, River Petteril, Eden Lower).

We are looking for landowners and farmers who would like to have the hedgerows on their land surveyed for free! [To register your interest please email naomi.walker@fld.org.uk](mailto:naomi.walker@fld.org.uk)

We are using the Great British Survey Method to do this, and all the results are uploaded to the PTES website and added to the 'Hedges & Edges Survey' project. These results can then be exported to QGIS.

Volunteer Surveyors

To do this we are recruiting volunteer hedgerow surveyors. They will receive training and on-going support from our staff for the duration of this project.
